

ORAD HI TEC SYSTEM

GROWTH PLUS DIVIDENDS

Following reasonable first quarter sales and profit growth, Orad is paying out a 17 US cent dividend per share. Up to now, the fact that the TV graphics specialist balances its account in US dollars was a knockout criterion for many investors. The Euro's weakness could alter that. A closing price above 2.80 Euros would be a signal to buy. Bolstered by several major new contracts, and the announcement that in the future, too, it will distribute a third of profits, the takeoff should succeed.

Orad (in € 13:27 h)
