

Orad Hi-Tec Systems

Plenty of Cash, Good Outlook

Even in its early years Orad's shares always raised several-fold after stockholder forum presentations. This time they performed even more than respectably the following week. The changed trend should be lasting. In the third quarter the Israeli TV graphics specialist hiked its profits by about 30 percent. With 16 million US dollars in cash and excellent growth perspectives for 2010 the share is not expensive.
